It is not strictly speaking a design program like Adobe Illustrator, but it is used to apply the technique of _image editing_ in creative ways. Bridge is also the default location of the Save and Print dialog boxes. * Adobe Camera Raw, a popular alternative to Photoshop's editing tools. * Adobe Lightroom (or related products like Adobe Photoshop Elements). * Adobe products such as Illustrator, InDesign, and After Effects for more advanced effects and opportunities for design thinking. While Adobe's Photoshop CS and CS5 software is popular, you can use older versions of Photoshop and Adobe Photoshop Elements

When the user enters anything in this empty field my application crashes and I get an error message. As I have more loops I would like to make this as general as possible. I tried this if(!globals.userProfile.fname==""){ But the variable is always defined when I do this. A: If globals.userProfile.fname is a string, you should use if (!globals.userProfile.fname) if it's an object, use if (typeof globals.userProfile.fname =='string')

The development and utilization of complementary and alternative therapies during pregnancy. A number of complementary and alternative (CAM) therapies are being used for medical reasons by women of childbearing age. The aim of this study was to assess the knowledge, use, and attitudes of pregnant women towards CAM therapies. Questionnaires were distributed in antenatal classes to all pregnant women attending four antenatal clinics. Completed questionnaires were received from 869 women. The most common CAM therapies used in pregnancy were herbal medicines (71%), followed by chiropractic treatments (46%). Nearly a quarter of the pregnant women felt that CAM treatments could be beneficial (25.9%) and over three quarters felt they could be harmful (75.8%). The main reasons for using CAM therapies in pregnancy were to improve the baby's health (59%), the mother's health (20%), and other benefits to the baby (17%). However, only 14% of women were advised by their antenatal care professionals to use CAM during pregnancy. The results of this study highlight the need to increase awareness amongst antenatal care professionals of the potential benefits and risks of CAM therapies.Next time you check your voicemail, you'll probably find little annoying phone message asking you to add your Twitter handle. Twitter is adding the option to set your Twitter information on your voicemail greeting this week, Twitter announced Monday. The tech giant is rolling out the voicemail feature for its iPhone users later this week and it will arrive on the Android app soon. The Twitter app will now include a green phone icon on the voicemail card, letting users quickly play the voicemail and add their Twitter handle and — if they want — opt in to a Twitter follow up. The voicemail feature helps Twitter build "moments" in the form of Twitter cards that appears as part of the voicemail message and lets the sender list the Twitter handle of the recipient. These cards have been part of Twitter's Web and mobile apps for months. The Twitter card will also feature a URL for users to get more details. The new feature also comes just a day after Twitter announced a cross-platform, VoiceTweet integration. Twitter has already rolled out voicemail greetings to Android users for a while. The feature rolled out to users in Australia and Canada earlier this year. The feature has also been available to iPhone users in the U.K. since 2012. Twitter plans to continue rolling out more improvements to the voicemail experience. The company recently added the ability to have
