1. Technical Field The present invention relates to a protective device, a tape dispenser, and an electronic device, and to a structure for fixing a protective member in a tape dispenser or an electronic device.

2. Related Art When manufacturing an electronic device, there is a need to protect an electronic component thereof. For example, when performing a wire bonding process that bonds between a terminal of the electronic component and a lead of a lead frame, after the electronic component is positioned on the lead of the lead frame, the electronic component needs to be fixed to prevent the electronic component from being shaken. Thereby, if the electronic component is continuously shaken, there is a risk that the electronic component will come off, resulting in
