* Very easy to use: Input the Unicode character, and choose the preferred category (hiragana/katakana) and basic character from the drop down list. * Very easy to use: No crash problems and no time consuming index process. * If you input the character incorrectly, just press "Correct" for the first example and then you can correct it * It has a standard font which is included in Windows and also supports multiple fonts. * All characters which are used in standard Japanese fonts can be recognized. * All characters are in kanji. * Input the Japanese text to the japanese input box. * Use the standard font with the Japanese input box. LearnMangaYahoo is a list of the most popular manga translated into English for free. To get something new you can subscribe to their newsletter. I've never received one so I don't know how good they are. Astronomy Channel - A large format compilation of space images by the amateur astronomer community. Free images from the Sky.org site. Updates every 5 minutes. The top image in the channel is always the largest. BGK: The Big KA: Kids And Anime - In fact, I love this show. The BGK is a "Kanji Academy", where the kids learn kanji and Japanese history. Funny Video: Krazy Kat - YouTube video featuring the cartoon character Krazy Kat. The video begins with the words "I am the king of Goof!", then the cat's cartoon antics follow. The Teens Knit Together - British knitters Ruth and Miriam interview each other about their knitting lives. Wild Thing is a free-living bisexual water nymph that happens to love living things, particularly fish and turtles. Very cute -- and feels good to look at. "Experimental, discursive, and elegiac." That's a nice way of saying "beautiful". From the 'Possible Futures' Index of the Musey Foundry, this is the kind of piece that raises questions without giving answers. It just says to the reader (me) "click" and "feel" (us). Well, this piece does both. It's a process that gives a couple of moments of pause. It makes me think about those who are stuck inside here in the SMA. I'm sure I've seen something like this

The sperm of many animals are morphologically and physiologically normal. However, the sperm of many other animals, such as humans, can be highly abnormal, and the cause of that abnormality is a major unsolved problem in evolutionary biology. In the absence of behavioural data, we investigated the possibility of an active role for sperm in the management of conflict between sex partners over who has paternity of the fertilized egg. Using a novel design for studying sperm competition, we show that the likelihood of seminal transfer to a female depends on the interval separating mating from insemination in the socially monogamous seabird, the yellow-eyed penguin, Eudyptula minor. We found a strong tendency for the last of a group of birds to be the first to inseminate a female, and further that time of insemination strongly determines which DNA strand of the egg is associated with the sperm. We posit that these unusual results can be explained by a balance between within-pair conflict 3a67dffeec
