and bring them into a drawing to review and edit as needed. (video: 1:48 min.) Get more detailed information about what's going on in your drawings by adding and viewing alternate views of markup content, such as isometric and isometric orthographic views.

(video: 1:09 min.) Easily compare drawings on a network by checking for differences between versions and revisions of the same drawing. Add comments to show the differences and build a history of edits in a single drawing. (video: 1:21 min.) Extend the power of Markups Assist

by storing custom objects, such as point collections, in Markups Assist and reusing them in a new drawing. (video: 1:45 min.) Automatic Repair for Assembly Drawings: Identify and automatically fix errors in assembly drawings and create assembly

layouts from 2D information. (video: 1:50 min.) Use annotations and text annotations to set up your drawing layout. (video: 2:11 min.) Create an assembly layout from a database, a PDF or a group that contains your drawing or drawings. See how to work with

groups and layouts. (video: 2:36 min.) Improve your drawings through the use of graphical previews. Use the viewport to change how a view displays your design. (video: 1:33 min.) Get assistance when you need it, without the need to jump from drawing to

drawing. Fix problems automatically without having to open the problems in an alternate drawing, and immediately show the work-around to others. (video: 1:45 min.) Reuse and update the same annotation quickly and easily. Save an annotation as a Markup
