
Mercury Outboard Motor Year By Serial Number ((HOT))

The #1 Mercury 3820F is a gearhead outboard engine with a 40 horsepower torque rating. Located at the base of the boat is the outboard motor with a yellow and white decal. There is a red lever to the left of the outboard motor that has blue lights on it. There is a green and orange switch that sits at the top of the outboard motor and the red lever. The red lever has blue lights on it. There is a Mercury Marine Logo on the back of the outboard motor. This makes this one of the most valuable outboard motors that you can own. The #1 Mercury 3820 is a gearhead outboard engine with a 40 horsepower torque rating. There is an ignition switch at the front of the boat that has green lights on it. There is a red lever at the top of the ignition switch to the right. There is a switch to the left of the ignition switch that has red lights on it. There is a red lever to the left of the ignition switch that has blue lights on it. There is a Mercury Marine Logo on the back of the outboard motor. This makes this one of the most valuable outboard motors that you can own. The #2 Mercury 3820 is a gearhead outboard engine with a 40 horsepower torque rating. There is an ignition switch at the front of the boat that has green lights on it. There is a red lever at the top of the ignition switch to the right. There is a switch to the left of the ignition switch that has red lights on it. There is a red lever to the left of the ignition switch that has blue lights on it. There is a Mercury Marine Logo on the back of the outboard motor. This makes this one of the most valuable outboard motors that you can own.

Mercury Outboard Motor Year By Serial Number

This information is for a description only. Most if not all motors have a serial number listed. Unfortunately, the serial number does not definitively tell me which brand or year your motor was made. For this reason, I am unable to provide you with any further assistance. This is a direct email address to the Mercury Marine parts department and includes the registration number of the outboard. There is no additional charge for this service. The reply takes approximately 24 hours and will include your part number. My Boat (Mercury)... Mercury serial # K239814... gave it up.... All I have are the frozen pedals. I have all the replacement parts Mercury says will fit... and the rec. manual for my motor. My motor has not run in 2 years... it is really hard to watch it die... I live in Alabama and it is the coldest day in months.... Anybody know what Mercury Serial # K239814 is on a Mercury outboard??? I want to fix a problem with my Mercury 40 RCTI 4.0 Mercury Outboard Motor. What part number should I be searching for to fix it. I searched all over and cannot find what I need. The boat it is on is a 2010 PT45R-2A. I know its a lot to ask, but please help. I paid a boatwright to get it fixed, but It still won't turn over. I'll post pictures of the problem if anybody can tell me what I need. Thank you I have an outboard Mercury, a 454 a half hours ago a technician was trying to fix it and said that the freeze plug was not in place. I am not a mechanic but I am fairly tech savvy and I was wondering if you could tell me what the freeze plug is and what I need to have it re-attached. I am also looking for the serial number that would go with the part number so that I can find it. Thank you! 5ec8ef588b
