Can I just say what a relief to find someone who actually knows what theyre talking about on the internet. You definitely know how to bring an issue to light and make it important. More people need to look at this and understand this side of the story. I was surprised youre not more popular because you surely possess the gift. Read More at: How to get help of the graphics from the TensorFlow library in Python? I wish to get the graphics created and to transfer them to other sources (PDF, TikZ). It is already available in Matlab through functions like: graphics tools convert, importdata, exportdata, pdfwrite How I can get it from the TensorFlow Library? A: tf.graphics.canvas.Draw() method allows you to draw a TensorFlow tensor as an image. For example: import tensorflow as tf sess = tf.Session() with tf.Session() as sess2: sess2.run(sess.close()) sess = sess2 test = tf.constant([[1,2,3]]) # draw the tensor as an image. with sess.as_default(): g = tf.graphics.image() g.set_data(test.numpy()) g.save("test.png") Charli's Two-Wheeled Adventures What do you get when you cross a bike with a skateboard and add some gravity? Well, if you're lucky, you may get the perfect little transport known as the Killa Board. This bike has been designed by two people who decided to mix two things they love, but they wanted to do it right. They say that the Killa Board is easy to ride, with a secure seat and a stronger engine than a regular bike. It's available in a range of colors and comes with an adjustable seat, and it's modular, which means you can build your 79a2804d6b
